PERSONAL LETTER FROM THE MANAGER

We publish today a statement by the business manager. It is self

explanatory.

Comrades: Kindly consider this as a personal letter, not only to you individually, but to every Socialist local and labor union interested in our paper. I ask that it be read and acted upon.

Last January the board of directors issued a call for \$25,000 to pay old debts and enlarge the paper.

To date \$8,900 has been subscribed, of which amount \$4,200 has been paid

To Hold Big Debate

One of the liveless events of this campaign will be the great campaign debate on: "Which Is the Best for the City of Chicago, the Election of Meriam, the Republican, or Rodriguez, the Socialist, as Mayor of Chicago?" The Republican party will be represented by one of its ablest official orators, Benjamin Fay Mills. Rodriguez and the Socialist cause will be represented by Arthur M. Lewis, the Garrick lecturer.

J. Hamilton Lewis

Negotiations are in progress with the Democratic committee to have Harrison represented by one of the best speakers in the Harrison camp. Republicans and Socialists are agreed that J. Hamilton Lewis is the man for this important task, and he is specially named in the negotiations.

In this connection I would ask comrades who have made short-time loans to be lenient. Every one will be paid, for I have confidence that the call will be heeded.

I hereby promise our readers outside of Chicago that it will not be long before
they will receive an eight-page paper.

With these preliminary remarks I now come to the main question.
We called for \$25,000 and we MUST HAVE IT. We started the eightpage paper before one-half was subscribed, confident that the comrades of
Chicago would appreciate it by renewed efforts.

We will start with eight pages to the country, assured that they will
respond as nobly as they have done in the past two months.

BUT, COMPADES, DO NOT BE DECHIVED. We cannot carry the
burden of the past.

We must get rid of these old debts or all our present efforts are in vain.

The future is bright. We are making splendid progress, but the past is "I told them the telephone could stay broken if union men were not to be had to repair it," said Mrs. Collins.

It was reported that the police at Englewood station had arrested an automatic telephone company's electrician, Kelsic by name, on a charge of assault. The report could not be traced to an authentic source, however.

By seven o'clock this morning the New Hampshire was again belching forth flame and she fired her salvos of twelve, eight and seven-inch guns. Smoke and flame poured from the hull of the San Marcos as the shells hit. Spray dashed two hundred feet in the air. The New Hampshire which did the firing, was never less than five miles from the target.

Although richly productive of technical information, the firing thus far has been disappointing in that it has shown the "delayed explosive" shells to be not wholly reliable. More than one burst in midair a mile from the target. Great secrecy was maintained today by naval officers as to the exact damage inflicted by the huge shells, many of which came up to expectations and exoloded in the battleship. It is not desired that foreign nations profit by the results of the costly experiments.

EXPOSE RAILWAY **WELFARE IDEA**

"Organizer" of "Investors" Association Gets Applicants Under Duress.

Cleveland, O., March 22.-An alleged attempt by railroads of the country to organize their one and one-half million uployes in a campaign to escape con trol by the interstate commerce com ssion and to raise all tariffs has come to light in Cleveland.

Employes "Urged" to Join

The expose of the scheme came about after an "organizer" representing the American Railroad Employes and Investors' association visited every de-partment of the Lake Shore Railroad

mpany. He urged employes, from chief clerks in the departments to section men, to join the association.

His chief argument, the men say, was that the association stood for the pros-perity of the railroads, the investors and the men.

Seven Hundred Bulldozed

Petitions were also sent out by heads of all departments and the men asked to affix their initials if they wished to join the association. About 700 local employes have joined the Cleveland branch of the association.

MINERS ATTACK BELMONT BODY

National Civic Federation Repudiated by Delegates of Sub-District 6.

Special Correspondence. East St. Louis, March 22.—The min rs of the Sixth sub-district of the United Mine Workers of America, in convention here, indorsed the action of the miners' national convention in repudiating the National Civic Federa-

convention here also took issue with the convention held by District 12, of which sub-district 6 is a part, when the union denying any man member ship in both the miners' organization

and the National Civic Federation, was disapproved of by District 12.

The action taken by Sub-District 6, whose delegates represent 17,000 Illinois miners, was in direct conformity with the Germer resolution which the na-tional convention passed.

Confirms National Action

The action taken by the national body in regard to the National Civic Federation was two-fold. First, the Germeresolution, denouncing the Belmont organization, was passed; second, an amendment to the constitution was passed making any member of the National Civic Federation ineligible to membership in the United Mine Workers.

This action was soon followed by the resignation of John Mitchell, former of America, from the position he held as "mediator" for the National Civic Federation.

A PAINTER'S DREAM

A painter sat on his perch one night, When his hard day's work was o'er, And weary from tool he fell asleep By his humble cottage door.

He dreamed he was owned by a syndi-cate.

And across the midnight sky
They had ordered him to paint their ad
In letters a full mile high.

Aloft on a giant scaffolding From a couple of planets he swung, With a brush made of a comet's tall, High over the earth he hung.

But as he started to paint that ad, He listened, and from below There came to straining ears the sou Of laughter and wails of woe.

He saw the crusts which the tollers eat. The boards of the rich heaped high, The lights that streamed from palace

And his own wee cot hard by.

He saw the tolling masses
Go each one his separate way,
And the chain of poverty closer draw
At the end of the long, long day.

To saw the children in the mills, To'n away from home and school, And set to work that dividends Might gild the head of a fool.

Atlaze with wrath he turned and wrote In colors of shining light, Across the black of that midnight sky-Workmen of the world, unite!

A mighty cheer came from below,

That echoed through heaven's dome
And, stepping back, he tumbled off,
And woke on the parch at home.

The labor press has been the only medium presenting the side of the workingmen. To counteract the lying reports about the strike the boilermakers, the Utica strikers prepared a statement of their case and sent it to the newspapers in the hope of seeing it printed, and thus offset many of the false statements which emanate from the officers of the railroad and are given wide publicity. The newspapers, however, evidently felt to allow the strikers to tell the truth and to let them state their case would not exactly win for the papers the affection and gratitude of that corporation. Hence the statement sent in by the strikers was promptly consigned by the editors to the waste basiet and

"The attitude of the Utica papers is in harmony with the daily press throughout the country, and this attitude, if continued, will force the launching of daily labor papers generally. "The workers can never get a square desil from newspapers controlled, if not directly, yet indirectly, by the influences whose interest it is to keep labor in chains. Hence it is plainly apparent that a daily labor press is a certainty.

MINERS QUIT WORK

By United Fress.
Wheeling, W. Va., March 22.—The 800 miners who on Sunday voted to ignore the sympathetic strike order issued by National President Lewis, decided to change their tactics last night and obey the strike orders. As a result, all mines affected by the strike are idle today. Everything is quiet.

A majority of the men say the strike order will be obeyed until April I and then, when President Lewis retires they expect the new administration under President John P. White, either to adjust the strike or revoke the order of the sympathetic strike. No trouble is anticipated.

Great Britain proposed, in 1895, to seize disputed territory between Venezuela and British Guinea. President Cleveland wrote a letter to Great Britiain the so aroused the war spirit in this country in support of the Monroe doctrine that the English agreed, after having refused first, to submit the matter to arbitration.

Hawaiian Situation

United States influence was a factor in the everthrow of Liliuckatani, queen of Hawaii, and the annexation of those islands in 1898 to this country.

Incidentally the United States has been credited with "intervening" President Castro out of Venezuela; President Zelaya out of Nicaragua; in adjusting a squabble between the Dominician republic and its creditors and in settling the recent disturbance in Honduras.

TOM TAGGART KNOCKS OFF LID AT FRENCH LICK

French Lick, Ind., March 22.-Charge are made here today that the lid has been tilted at Tom Taggart's French Lick resort and that gambling has re-sumed all the old-time vigor. For some time it was believed the famous resort had taken on the "simple life" for good, but the reformers have almost given

up hope and say they have appealed to the governor. Recently charges were made against Town Marshal John Ballard for failing to stop the gambling and an attempt was made to put him out of office. For a time the gambling rooms were closed, but when Ballard secured a continuance in his case the reformers allege the gambling again opened up and the lid is now completely off.

MAN ON A BALL TEAM MANAGER CHASE PITCHER IS MOST WORRIED

San Francisco, Cal., March 22.—Ben Hunt, the crack whipster of the Boston Red Sox, knows more about the pitching end of the national pastime than most of the major league mound ariists and has made a thorough study of the finer points of the slab stunt.

"I have been asked many times," remarked Hunt recently, "does a pitcher have an easy time? People are led to believe this because each man is only called to work about once a week.

"A pitcher worries more concerning his physical condition than anything else. He must map out his daily work and keep primed for duty. Mental condition is very important. Often you hear this remark. He has gained confidence in himself and he is pitching great ball." This confidence is in a free and easy condition of mind caused by the or three successive victories.

great ball.' This confidence is in a free and easy condition of mind caused by two or three successive victories.

"Think of the conscientious pitcher who loses six or seven straight games, and don't you believe he has no sleepless nights?. While this man is pitching he is apt to think more of the final result than of his immediate work.

"Needless to say, he 'ler a severe strain by overtrying to such an extent that all effectiveness is lost and he generally loses another game.

State Senator Helm, chairman of the bribery investigating committee, said that the decisions in the court cases would not affect the senate committee in any way and that the investigation would be carried on independently of the curt results in the case. It is likely the committee will hold its first meeting the first part of the coming week, as the case of Broderick is expected to be disposed of by that time. Former State's Attorney Healy of Chicago has tentatively agreed to act as attorney for the committee. Healy wants \$100 a day.

'Truth About Mexico? Take Your Choice."

This is the caption of the Tribune's review of the two new books on Mexico. To John Kenneth Turner's "Barbarons Mexico" is given more than a column and a haif of fair quotations and comments. The facts given by Turner are so striking that even a capitalistic sheet has to sit up and take notice.

Creelman's "Dian: Master of Mexico" is dismissed with a few inches of space, as apparently unworthy of no-

ico'' is dismissed with a few inches of space, as apparently unworthy of notice, 'It is entirely adultory,' says the reviewer. 'It does not read like the work of a man who knows his subject more than superficially.''

It is well that the two books were pudished so nearly simultaneously. The damning facts shown forth in Turner's work are rendered all the more striking by the weak defense of Diaz. 'Barbarous Mexico'' is one of the most important and timely books of the year. The price is \$1.50, and it is for sale in our book department.

There won't be any more declarations of war. That may be taken for granted. The Russo-Japanese war settled that foolishness. Henceforth folk may talk of international politeness till the cows come home, but it will be futile talk. Declarations of war are out of date. If the improbable happens—a war will. Out of a tissue of lies mingled with truths told to be believed, war will develop suddenly and unexpectedly, like miraculous lightning from blue sky. No. There won't be any more declarations of war. There may be some honor among thieves, but when it comes to a showdown, there is no honor among capitalists. The Japs forced the showdown in their first war with a "civilized" foe. And, honestly, why should there be honor among capitalist mations that continually keep armed hosts as a menace to each other? There's no honor among wild beasts, is there, when it come to the crucial moment of battle?—Editor.

SPECIAL ANNOUNCEMENTS

The County office has on hand a limited supply of the city platforms in Polish and German. The German platforms were donated to the county organzation by the German Karl Marx club. Large posters are now ready as well as he March "Next Step" and the municipal platform, post cards of the city candidates, buttons, etc. Do not delay in getting a supply of same.

Special Union Leaflet

One hundred thousand copies of a special trade union leaflet is now on hand. This leaflet, while made up especially for the purpose of circularizing unions, is also adaptable for ordinary use, as it contains excellent propaganda matter. This leaflet, in fact, is different from other leaflets, as it is the regular size of the Daily Socialist, four pages. Branches can secure same at the rate of \$1.00 per thousand while they last. Individual members desiring to secure these leaflets for the purpose of distributing them in trade unions, will be supplied free of charge.

PRESENT city administration has well been called a BUSINESS adminibusiness MEN and their agents have handled it from the be-

All shades of RUSINESS have been represent

helped themselves to everything in sight, at several investigating commit grand juries, and the Chicago Daily Socials I have proven beyond a doubt.

GRAPT IS BUSINESS IN POLITICS

It is no accident that our city hall is controlled by a gang of grafters.

Correct politicians are running the city government because the "respe" BUSINESS MEN have put them there.

The same capitalists who are mercileasly exploiting their we ck yards and the steel plants, in the departm stock yards and the steel plants, in the department stores and the clothing factories, on the street railways and in the gas plants—these same capitalists have seized the city government to increase their power and to protect their

These "respectable" BUSINESS MEN need corrupt politicians to do their

They need corrupt politicians to give them valuable franchises for little or

They need corrupt politicians to shift taxation from the wealthy corpora-tions to the backs of the poor. They need corrupt politicians to send the police against helpless strikers to beat them into submission.

Thus we see that our corrupt BUSINESS administration is part and parcel of the capitalist BUSINESS system that is exploiting the workers at every

WORKERS DESPISED AND NEGLECTED

Busse's BUSINESS administration has shown its contempt for the working class of Chicago in all its activities. There has been plenty of money to distribute among capitalist politicians, contractors and BUSINESS MEN, but ney could be found to carry through measures benefiting the working class.

no money could be found to carry through measures benefiting the working class.

The health department has been hampered in its efforts to protect the lives of our citizens by insufficient appropriations.

The firemen have been denied a two-platoon system that would enable them to spend a reasonable time at home with their families.

And, while thousands of dollars have been appropriated on plans for a "greater Chicago," not one cent has been appropriated to provide sanitary and comfortable dwellings for the masses of workers living in crowded tenements.

The real attitude of the Republican and Democratic BUSINESS administration toward the working class has been shown recently in the garment workers' strike.

while scabs and thugs were authorized to carry arms, orders were given to and club innocent workers. beat and club innocent workers. Hundreds of strikers were arrested without cause and several were shot

In this strike, just as in the teamsters' strike when Dunne was mayor of Chicago, all the powers of city government were placed at the disposal of the employers to aid in beating the workers into submission.

DIFFERENT IN MILWAUREE

Contrast this Republican and Democratic BUSINESS administration in Chicago with the Socialist workingmen's administration in Milwaukee. When the garment workers went on strike in Milwaukee Mayor Seidel notified the chief of police (this department is not yet under the control of the Socialists) that no brutality against the strikers would be tolerated.

The city government was on the side of the workers in this case, and the strike was won in five days without a blow, without an arrest, and without the loss of a single meal. Not only have the Socialists given Milwaukee an absolutely honest administration, but they have served the working class in every possible way.

They have raised the wages of city laborers from \$1.75 to \$2 a day.

They have raised the wages of city laborers from \$1.75 to \$2 a day.

They have encouraged the organization of trade unions. They have opened up free social centers in the public schools. They have bought six thousand acres of land, where they intend to erect comfortable homes for workingmen at cost. In less than one year the Socialist administration has done more for the workers of Milwaukee than was ever done before.

WORKERS CAN DECIDE

WORKERS CAN DECIDE

The workers of Chicago now have the orportunity to decide whether they want another Republican and Democratic BUSINESS administration or a Socialist workingmen's administration such as they are enjoying in Milwaukee. It ought to be plain by this time to the working people of Chicago that they can hope for nothing from the Republican and Democratic parties.

These parties work hand in hand and are absolutely controlled by the hig BUSINESS interests that 'ontribute their campaign funds. Busse, the Republican, was carried into office by the aid of Democratis working under the direction of the Democratic boss, Roger Sullivan.

THE "GOOD" MAN DELUSION

Sometimes the capitalist politicians decide that they can fool the voters most easily by nominating a so-called "good" man for office. No 'ntelligent workingman any longer expects to gain anything by voting for 'bese "good"

These "good" men running on the Republican and Domocratic tickets will serve the BUSINESS MEN who furnish the money to put them into office. There "good" men and "reformers" have never done anything substantial for the working class, and never will, because, without exception, they stand for the capitalist system of industry which is responsible for the explcitation and misery of the working class.

MUST ELECT MEN PROM THE WORKING CLASS.

If the working people want to have their interests protected by the city government they must elect men to office from their own class. They must elect men who have absolutely no connection with the Republican and Democratic parties.

They must elect men whose support and campaign funds come from the workers and who are pledged to fight for the interests of the working class.

THE SOCIALIST PARTY STANDS FOR THE WORKING CLASS. The Socialist party of Chicago, in convention assembled, calls attention to the fact that practically all its members and candidates for office are actual

Every candidate of the Socialist party is pledged, if elected, to serve faith-

Every candidate of the Socialist party is pleaged, if elected, to serve rain fully the working people.

Our ultimate goal will be reached only when every important industry is controlled and operated by society and production is carried on to promote the general welfare rather than for private profit.

Every measure that tends to bring us nearer to complete social democracy and every measure that tends to improve the condition of the working class will receive the hearty support of the Socialist party and its representatives.

OUR PROGRAM.

OUR PEOGRAM.

Among the measures favored by the Socialist party are the following:

1. We demand that a new charter be forms isted and that the city be empowered to control its own affairs and to meet the needs of its own life.

We ask for complete home rule in municipal matters and for the initiative, the referendum, and the right of recall.

2. Equal and unrestricted suffrage for men and women.

3. We favor the municipal ownership and operation of all public service enterprises such as street railways, subways, wharves, telephones, gas and electric light plants as soon as possible.

Up to the time that public ownership and operation is secured all public service corporations shall be compelled to grant the best possible service at the lowest rates and an eight-hour day and union conditions to all their employes.

4. The condemnation and destruction of all insanitary tenements and their replacement by model dwellings, to be resited at cost.

5. An equitable system of taxation that will compel the big corporations and wealthy tax dedgers to pay their rightful share of 'aunicipal taxes.

6. The abolition of the city contract system. We would substitute in its place direct employment by the city, with an eight-nour day, a union scale of wages, and a Saturday half holiday.

7. Freedom of all city employes to organize into trade unions.

8. The establishment of a double-platoon system in the city fire department.

9. The appropriation of sufficient funds to the city health department to enable it to do its work properly.

The present appropriation should be doubled to secure better protection of the workers from disease and accidents in factories and workshops; to secure better care of the physical conditions of school children; to provide for a force of inspectors sufficient to enforce the laws against impure foods and insantary housing, and to redouble the warfare against tuberculosis and other communicable diseases.

10. The appropriation of sufficient funds to the department of education to put our system in th

cable diseases.

10. The appropriation of sufficient funds to the department of education to put our system in the forefront of educational progress. More emphasis should be placed on the teaching of civics and economics, the physical development of the children and industrial education.

11. The free use of public schools for social, educational and political

12. A further development of our system of parks, playgrounds and public

The enactment of this program will do much to improve the condition and increase the power of the working class. But we must do more to put as end to the exploitation and injustice of capitalism. The capitalist system of industry must be destroy, I root sach branch.

In its place we must establish a democratic co-operative industrial system owned by all the people and operated for the benefit of all the people.

The workers of Officago cannot achieve freedom by securing control of Chicago alone. We must also unite with our follow workers to secure control of the state and astional governments.

Therefore we call upon the workers of Officago to unite with us for this and every other campaign; to join the American section of the International Secialist movement which stands for the working class throughout the civilized world. Thus, and thus only, can we establish a real industrial democracy. Thus, and thus only, can we establish a real industrial democracy. Thus, and thus only, can we gain for ourselves and our children freedom, culture, security and happiness.

J. PIERPONT MORGAN BUYING UP THE MAGAZINES

Wall street rumors indicate that the day of the Muck Baker is at an end. It is reported that Morgan and the big interests are buying up the radical magnatines as fast as possible, and that within aix menths all exposures of Big Business will stop. The American Magnatine, according to the report, was one of the first to be bought up. No longer will it or the other capitalist magnaines tell of the atrocities being perpetrated in Mexice today, by the help of the United States government, for the profit of American capitalists.

Today on our southern border UNIT-ED STATES TROOPS are massed to prevent the escape of the Mexican revolutionists who week refuge in our Land of the Free (1).

The work of SUPPRESSING INFORMATION in the United States is making swith headway. Plausible books have been published and are being distributed through our public libraries to prove that Diaz, the bloody dictator, is a humans father to his people, working casaclessly for their advancement.

Do not permit the American workingmen and women to be deceived in this matter. The Mexican revolution is YOUR revolution. If the capitalists are permitted to maintain, slavery in Mexico, they can and will grush down American wage-workers to the Mexican level.

Be that the Public Library in your city is supplied with John Kenneth Turner's book,

to counteract the work of Big Capital, and open the eyes of the people of the United States. Silence on our part will permit Morgan and such men to aid Diax in maintaining his autocra've that permits capitalists to buy and sell slaves in open market. Strew the southern border of the United States with capies of BARBAROUS MEXIOO, so that American soldiers may know what they are doing when they shoot down mer in revolt against Diaz and his butchers.

BARBAROUS MEXIOO will throw needed light on this dark subject. It is not filled with rash assertions, but with proofs of horzors almost beyond helief, and of the compileity of American officials, even Taft himself, in Diaz's tyranny.

"Effective Speaking"

By EDWARD ARTHUR PHILLIPS Author of "The Tone System," "Natural Drills in Expression," Etc.

Adopted by Representative Schools and Universities Throughout the Nation In this work is found the first presentation of the true principles effectiveness in speech. It is a distinct departure from anything

yet published on the subject. There is no book now in your library that can fill the place of "Effective Speaking." This book presents the essentials of effectiveness in all departments of speaking—business, social and public. It trains the judgment in the use of the great principles that govern power and success in speech, and offers a logical way to develop skill as an extem-

oraneous Speaker. Further, this book presents a complete set of Exercises covering every important point discussed; also, a complete set of Questions. It gives over one hundred examples from master speakers illustrative of the principles developed, and offers a list of choice reading personally selected because of its value to speakers.

If you wish to increase your power as an entertaining speaker, read pages 63 to 78; if you wish to increase your power as a convincing speaker, read pages 42 to 47; if you wish to increase your power as an impressive speaker, read pages 39 to 42; if you wish to increase your power as a persuasive speaker, read pages 48 to 62; if you wish to increase your power of memory, read pages 211 to 213; if you wish to increase your power to speak extemporaneously, read pages 88 to 171; if you wish to improve your style, read pages 181 to 201.

Two Kinds of Women

In old Athens there were two classes of free women, citizen women and the "strangers."

The first class led a very unhappy, restricted life. They were kept in especial apartments assigned to them on the upper story of the house. They saw no men but their husbands and very few women of other than their own households. Their duties were te make the clothes, nurse the bables and take charge of the provisions. The marriages were made at a very early age by old women, who explained to the respective parties the qualities of the other. The result was that the women consoled the men and their loneliness with too much wine, and tho' faithlessness was pulsabed cruelly, it was not uncommon.

"Great," says Pericles, "is the glory of that woman who is least talked of among men, either in the way of praise or blame." According to that, the Athenian women were the greatest of the great.

The "strangers" had no rights or privileges in the state for fear they might corrupt the pare citizen blood. Therefore, so long as they did not marry a citizen, they were completely free to do asything they liked. And, of course, they became the congenial companions of the men, taking the place not filled by the wife. They were able to held their own on any subject—art, war, philosophy and politics—and because of their agreeablesess were able.

No law or public opinion prevented these women from having two or more attachments, yet very often they were of such high moral character that in every way but before the law they were married to one man.

How a Mangler, a 'Cracker Grabber' and an Heiress Ended Slavery in California With a Desperate and Victorious Fight for an Eight-Hour Work Day for Women

Sacramento, Cal., March 21.—A woman laundry mangler, a woman "cracker grabber" and a woman of wealth have given to their sex among the workers of California, in an eight-hour law for women, just passed by the legislature, as rigid and sweeping a measure governing female labor as exists anywhere in the Union.

All of them are young women. They went through a desperate fight in the legislature in which the issue was squarely between labor and capital. And they won because "Big Business" fought them too fercely—so fercely that behind and through the platitudes, the spacious arguments of corporation lawyers showed the ugly fact that "Big Business" sets value only on the flesh of women and makes no reckon of souls living and souls yet unborn.

The laundry mangler is Mrs. Hanna;

The laundry mangler is Mrs. Hanna Nolan. The cracker grabber is Miss Daisy Mank, the beroine of the session. The woman of wealth is Miss Maud Younger, a San Francisco beiress who is spending her life and her money for working women.

When, early in the session, Thomas F. Griffin, a country lawyer, came to the legislature with the draft of a ten-bour bill, Miss Younger and Frank Wolfe, a member of the Socialist lobby, asked him:

"Why not make it eight hours!"

The laundry mangler is Mrs. Hanna mento to represent the Central Labor Council.

With him went the agents of laundries, hotels, factories, sweatshops, of all business interested in the dollars to be wrong from women.

Eig Business laughed at Griffin's bill at first. The agents of the interests fought it perfunctorily in the assembly committee.

Amendments were suggested to make it unconstitutional. But labor saw the

member of the Socialist lobby, asked him:

"Why not make it eight hours!"

Griffin made it eight. Then he handed it to committee minus the jokers. And labor saw to it that the bill went out of committee minus the jokers. And labor saw to it that the bill went out of committee minus the jokers. Big Business laughed again.

Then the assembly passed the bill—as it was written. Many assemblymen to Saframento to fight.

Organized labor made the women's Committee.

It was before the senate committee that Daisy Mank became the boroine, fight its fight. John I. Nolan, an able lawyer and a fighter, was sent to Sacra—

tions opposing the measure, has been told.

It was a bitter fight. The women hore the brunt of it. The majority of the committee was unfavorable. The bill languished for weeks.

Big Business sought to have the bill amended in a dozen ways. Delay after delay was granted. Finally, when two members were absent, the committee reported it out favorably.

The women had won.

It took nearly a day to end the fight in the senate. Gates and Wright, senators from the open shop country, Los Angeles and San Diego, one a half-way reformer and the other am out-an-out reactionary, fought hand in hand for the business interests.

Caminetti and Shannahan, senators from the up-country mountain districts, fought for the women.

MERE MAN'S REWARD

COMES—IN 2000 A. D.

It is the year 2000. The famous woman orator is addressing an enthusiastic audience. During the course of her remarks she said with fervor:

learning the truth of her present position in society, and finding out how to improve her lot with the aid of her brother.

In other words, woman is awakening. Not cally has she eatered social in dustry, a field which she will never again desert as long as industry lasts, because it secures to her independence, but she has also entered the professions and is working successfully in the departments of art, science and education.

Medical men for fifty years have been comparing men and women as to hrain, hody and social characteristics. They have done all in their power to prove in the laboratories that woman is inferior mentally to man, but all in vain.

prove in the laboratories that woman is inferior mentally to man, but all in vain.

They acknowledge their defeat.

Her seeming inferiority is only a passing phase. Woman is the type of the race and man is the secondary consideration of nature.

Women, too, in their first at akening have been largely imitative in their activities. Some women, foolishly thinking it wise to imitate men in their follies—as drinking and smoking.

Like the Japanese, they are also going further, becoming celectic, initiative and showing a genius in their works that fully equals man's, with the chances that she will outdo man in the race for a while, until she smalles him to recuperate and catch up with her. But this is in the near future.

Another awakening is that of imitiang her brother in trying to secure political rights.

A little history of the origin of the woman's rights movement in the United States would not below to place here. This is mainly taken from Bliss in "The Encyclopedia of Social Reform."

Cultivating Impotence Quit It!

Fitzpatrick, Nockels and other leaders of the Chicago Federa-tion of Labor, together with Robins, Darrow and other prominents more or less affiliated with them, have come out in support of Mer-

They have followed the lead of Noyes, former president of the Manufacturers' Association: President Rosenwald of Sears, Roebuck & Co.; Chas. R. Crane, vice president of the Crane company; Roy O. West, attorney for the Harvester Trust and prominent Republican politician, closely allied with Governor Deneen; Fred A. Busse, tool of the coal trust and head of the corrupt Republican machine which has controlled Chicago for the last four years, and others who travel with these gentry.

We will admit that Merriam is a man of good education, of considerable theoretical and some practical knowledge concerning municipal affairs; we will admit that he is what is conventionally considered as clean and decent; we will admit that he is a man of some

sidered as clean and decent; we will admit that he is a man of some ideals; we will admit that he is personally a vast improvement on

Busse, and probably on Harrison. But is that enough?

Does that justify leaders of organized labor in using their influence in his behalf?

The answer to that question is wrapped up in this other one: What should organized labor expect from a mayor of the city

Should it aim merely at conventional honesty and a measure of capacity in the public service, or should it aim at more?

II.

Granting that Merriam was not exactly the choice of Busse and his like, but that they rallied to his support merely to remain "regular," and to please the powerful financial interests dominating the Chicago Tribune, the Recurd-Herald, the Daily News and the Evening Post, the fact remains that these financial interests and suhe men as Noyes, Rosenwald and Crane support Merriam not

only sympathetically, but financially.

In fact, it is plain that not only one, but that quite a few money barrels have had their heads knocked in and their contents emptied

in behalf of Merriam. Are Fitzpatrick, Nockels, Robins and Darrow green enough to

believe that Messrs. Noyes, Rosenwald and Crane, and the financial interests back of the Chicago Tribune, and the other newspapers referred to, support Merriam simply because of his conventional honesty and supposed capacity?

Coming to think of it, is it not a fact that Merriam has been

"groomed" for the mayoralty race for some time past by the aforesaid newspepsr giving him all sorts of publicity, altogether out of proportion to the few and unimportant services he has really rendered?

Since when have mere conventional honesty and mere moderate

capacity procured such support?

If you will but use common sense, Messrs. Fitzpatrick, Nockels, Robins, Darrow & Co., you will know that Messrs. Noyes, Rosen-wald, Crane & Co., and the powers behind the great capitalist news-papers of Chicago, would not lavish money and publicity on Mer-riam if he were not something else besides conventionally honest and fairly capable.

In fact, you know, Messrs, Pitzpatrick, Nockels, Robins, Darrow & Co., that Merriam would not have stood the ghost of a show to receive the publicity and financial support he did receive and is receiving, if Messrs, Noyes, Rosenwald, Crane & Co., and the Chicago Tribune and allied interests, were not quite satisfied that Mer-riam is, above all, "safe and sane" from the capitalist standpoint that he will do nothing of any consequence that will interfere with the profits of capital; that he will defend the "rights of property"; and that he fully indorses the subordinate position assigned to labor in the conventional social structure of today.

If thus organized capital demands of candidates for the mayoralty, as the price of its indorsement, more than mere conventional honesty and fair capacity, why should organized labor be satisfied with these qualifications?

Yes, but Merriam is a "friend of labor."

Supposing he is, and supposing he has demonstrated it on occa-sion by small favors, the fact remains that he is not SUCH a good friend of labor as not to be a BETTER friend of capital.

Messrs. Noyes, Rosenwald, Crane & Co. know what they are about, gentlemen, even if you don't.

The trouble is that you have been satisfied to aim at little on

behalf of organized labor and labor in consequence has been getting nothing, except when it was getting something "in the neck." The net result of your feeble and wabbling political attitude

has been political impotence. There was a time when most of you stood for Harrison. You

found that it availed you nothing.

Later on you stood for Dunne.

He made a mess of municipal ownership; turned the tables on you in the teamsters' strike, and generally demonstrated his unfitness for executive office to such an extent that the people of Chicago were ready to seek relief in the "business" administration promised Busse demonstrated what "business" really means, in connec-

to with the Lawrence Avenue tunnel; the furnishing of castings to the city; the settlement of "municipal ownership"; the bill posterity strike; the store drivers' strike; the taxicab strike; and the garent workers' strike. Yet you are now coming out in support of the candidate of the

same men and of the same newspapers who were responsible for

Is it any wonder that your own people have lost faith in your political judgment, and that they are just drifting along election after election, influenced by little favors, by little promise, by little considerations of little political jobs for a few personal friends, without any definite aim, without any central idea to guide them, without any inspiration to do and to dare?

IV.

Gentlemen, what you need is the Socialist ideal. Learn to seek for labor not favors, but MASTERY. Seek big things instead of little things.

Instead of indorsing this or that one of the mayoralty candidates of capitalist parties, strike out boldly and say that no candidate for mayor shall have your political support unless he stands first, last and all the time for LABOR, and wants for labor not merely recognition, by favors and jobs, but CONTROL of the policies and management of the city government in its own interest.

And when we speak of labor we do not mean a clique, nor even

the Chicago Federation of Labor, but the working class as a whole. Take that attitude, gentlemen, and you will see a transforma-

A transformation such as is taking place in Milwaukee now.
You will begin to command the support not only of your friends
in the federation, but of the whole mass of the workers of Chicago. The federation itself will be benefitted, and increase in member-

Strikes will be won that are now lost.

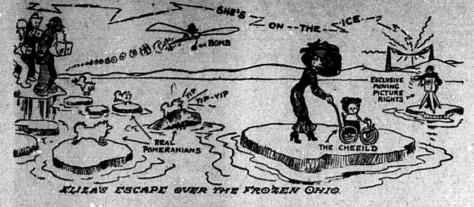

The affairs of the city will begin to be run in the interest of labor instead in the interest of capital.

You will fall in line with the aspirations of progressive labor all over the world.

You will look at politics with a new mind.

From a question of indorsing this or that candidate presented to you by political parties which have spat you in the face and betrayed you times without number, it will become a question of rallying and organizing all of the workers for the conquest of cities, states and nations—aye the world.

Where It Pays

Germany in recent years has greatly reduced the number of accidents in her industries. In fact, the accidents in the trades have been out down 50 per cent. The business houses have been very efficient helps in this desirable result.

For one thing they have a device by means of which in a machine with step pulleys the belt is shifted from one pulley to another while the machine is in operation by the operator moving a lever. This does away with the dangers from shifting belts by hand. In some cases an adjustable guard over a saw is a great protection; and there are many other devices.

In a recent article in American Industries William H. Tolman, director of the American Museum of Safety, says:

II. Tolman, director of the American Museum of Safety, says:

Practically all the German trade associations issue books and pamphlets with special hints and regulations for accident prevention. In addition to technical descriptions of the safety appliances themselves, the experience of the entire trade in dealing with dangerous parts of machines and processes is summarized for the benefit of the employer and his workman.

Nearly all the trade associations issue special rules, pamphlets and posters directing attention to the danger and menace of alcoholism. Popular lectures, the distribution of simple pamphlets and documents, are other methods.

While this has been going on in Germany accidents in American industries have been flagrantly on the increase. With the introduction of the dangerous forces of steam and power and the use of intricate machinery the number of accidents is enormous. In fact, more men are killed and mained in any one year in the industries here than were killed or injured in battle in the bloodiest year of the Civil War.

But in the face of this wanton destruction the American manufacturer is grossly indifferent and apathetic. Not because he is less kindly or less be-nevolent than the German employer, but because he is

nevolent than the German employer, but because he is not held responsible.

The only remedy against him is a suit for damages. The crippled worker or his widow, with few friends and less money, is on the one side, and the powerful mannfacturer on the other. The employer has little to fear from this unequal contest.

With the German e...ployer it is a different story. He must pay for some of the government insurance. German manufacturers are taxed for part of the accident insurance that is paid to German workers.

The Literary Digest, March 4, 1911, speaking of this, says:

The Literary Digest, March 4, 1911, speaking of this, seys:

When a firm enters one of the great German trade associations each part of its business is classified by government officials according to its degree of danger. It is thus forced to insure its employes automatically. If it succeeds in making its methods safer it may be placed in a higher class and secure better rates. Thus it is for the interest of every large company to reduce the risks in its operations as much as possible. Be we find the German manufacturer guarding his beits and pulleys and issuing educational pamphlets to the workers. He does this only because the German government holds him responsible. Therefore it pays him to safeguard the life and limb of the employe.

If the American workers elect their own representatives to congress as the German workers have elected Socialists to the German reichstag, the American manufacturers would also be held responsible. They would then be in a place where it would pay to safeguard human life.

Making a Mayor

BY JOSEPH E. COHEN

The attention of the people of these United States is respectfully called to political doings in the city of Philadelphia, and its suburban annex, Harrisg, the state capital.

Certain prominent gentlemen in the aforementioned city are pre-occupied with the task of selecting a mayor. And while these gentlemen are not at all certain that this is any of the public's business, we shall invite the public to

Certain prominent gentlemen in the aforementioned city are pre-occupied with the task of selecting a mayor. And while these gentlemen are not at all certain that this is any of the public's business, we shall invite the public to attend and witness what passes.

To begin at the beginning, we cannot inform the public as to whether a mayor is to be elected at all. Pennsylvania is governed by a constitution presumably, but only presumably. The constitution expressly states that the term of mayor shall be—but what is a constitution among political friends?

According to the constitution the term of the present incumbent, Mr. Beyburn, expired this spring. But the last legislature, in the discharge of its humble duties, rearranged the election laws, with the consequence that Mr. Beyburn will serve nearly a year longer.

You, unsophisticated reader, with some regard for our institutions, might imagine that was stretching the tenure of office idea quite enough. But that is because you are not a Philadelphian.

Be you must learn that all of a sudden Mr. Beyburn, in the eleventh hour of his term, discovered that the city needs many improvements. (Mr. Beyburn's party has been in office since goodness knows when, and you might ask why these improvements were not made long ago. But we will set that slip.)

To give Mr. Reyburn and his facultion of the Bepublican party, of which the banker, Glarence Wolf (also state senator), is the financial sponsor, are not the only prominent political gentlemen in Philadelphia.

There is State Senator McNichol, who is something of a city contractor, and comes the nearest to i_____ he boss of the town.

Mr. McNichol and Mr. Wolf do not embrace when they meet. And, it is said, at Mr. McNichol's behest, State Senator Tustin is to introduce a bill to remove the primaries from spring to October.

The object of this is to nip the Reyburn-two-year term. And, secondly, to make it difficult for those who want to clean out the Republican party from having time enough to roll their sleeves up.

In my undergraduate days at Harvard, we had dear old Professor Francis G. Peabody in the "Philosophy of Social Questions." He it was, as I have elsewhere set forth at some length, who taught our young ideas how to shoot radicalism in general and Socialism in particular. Safely he guided us past the Scylla and Charpbdis of these evils, and landed us securely in the haven of

radicalism in general and Socialism in particular. Sarley he guided us past the Scylla and Charydois of these evils, and landed us securely in the haven of Good Old Sound Capitalistic Common Sense. For which, praise be.

One set of facts and one conclusion in particular I still recall, despite the long years of decadence and back-sliding which, so far as I am concerned, have ensued in my social philosophy since having got from under his well-feathered wing. And these were certain data quite palpably demonstrating the certainty that the most successful form of uplift work is always one which can be made to bear its owr expense.

The good professor summed it up tersely, neatly and with lastine indelible force, in the one phrase: "Philosophy and Five Per Cent."

All these years I have remembered that phrase; thought about it betimes, and wondered at its Christlike quality of business efficiency. (The professor, by the way, is a clergynam and holds the post of "Plunumer Professor of Christian Morals." Therefore we know, as a mere matter of course, that he speaks by and in the spirit of the Nazarene. So, having all this time carried that dictum in my brain, imagine my pleasure and gratification on receiving, the other day, the following letter:

"SEATTLE COMMERCIAL CLUB, "Incorporated "Seattle, U.S. A. Feb. 27, 1911. Here a long list of officers, directors and ultra-respectables "Dear Siri—We thank you heartily for the space which you have already given in your columns" (I have no columns) "to the work which this club, co-operating with the Red Cross Society, is cond. ag for the relief of the famine sufferers in China. It would be well, in any appeal which you make, to bring this fact clearly home to the business men of your city and section.

Turn this letter how I may, consider and weigh and analyze it as best I can, I cannot find it greatly if at all at variance with the sterling-true motto of dear Professor Peabody.

To save a starving Chinese baby with your \$2 and at the same time relieve China—of something moveable—seems to combine the trust essences of philanthropy and a rake-off. Whether in this case it will come to quite five percent I don't know.

Japan is very inconsiderately diturbing the markets, which, since we are 3,000 miles further away and charge tar higher prices, should logically belong to us.

China too is just perverse enough to

We often see in the capitalistic papers the expression, "the lawless element" (the police and the militia are needed to protect us from "the lawless element"), and I have always wondered whom do they include under that title?

Do they mean Lorimer, who it is said lawlessly bought his sent in the senate, and his friend, Lee O'Nell Browne, that helped him along in the deal? Or the big clothing barons that hired thuys to kill slaves striking for a little more bread, and who use the blacklist?

And, you slaves, you foolish, not lawless element, support the press that dupes you, and that makes your misery possible.

You stuff your pennies, day after day, into the big coffers of the capitalistic hirelings, so an appreciation for their good work in keeping you in your boudage.

When will you learn to support your press, the Socialist press, that is fighting for YOU. DR. AKED wanted a new, big church, but Deacon Elder of the Rockefeller faction in the New York congregation squelched him by remarking: "We are not sure that we want a huge auditorium, filled with rambling, religious rubbernecks." Dr. Aked now rambles to San Francisco.

Mr. Fels writes us calling attention to a statement in the article which says the profit on a carload of boxes is two thousand dollars.

This apparently is a mistake, as Mr. Fels tells us "a whole carload amounts to only between \$500 and \$500.

We hasten to make this correction in the article, as we do not wish to comply with the truth in all cases.—Britor.
